Re: Total Ban of Texting and Emailing While Operating a Motor Vehicle

As most of you are probably aware. There can be very negative consequences to texting or e-mailing while operating a motor vehicle.

Therefore, starting immediately it is prohibited by company policy to text or e-mail while operating a motor-vehicle.

For those of you that manage field staff or contractors, please make sure you pass this on.

Should you have any questions/comments, feel free to contact me. –Tom
